

Alexander Vasilenko

Integration Engineer

About me

I am Alexander, an Integration Engineer and a full stack web developer looking for a challenging position to develop professionally and grow personally.

Eager to learn new skills, work with new technologies, take on extra responsibilities, set personal and professional goals, and surpass them.

Autodidact, disciplined and motivated with strong organizational skills and great capabilities in interpersonal relationships. Able to take initiative and lead when needed.

A great team player who brings great passion, experience and a strong sense of responsibility to the table.

Experience

2024 - Present

■ Integration Engineer

Global-E

Successfully conducted and supported countless integrations of the company's solution with a variety of systems and clients, ensuring effective communication and smooth data exchange.

- Provided technical solutions, support and troubleshooting for live projects, improving client satisfaction.
- Effectively collaborated with cross-functional teams, including software developers, project managers, and client success managers, to provide tailored and optimal solutions for clients.
- Ensured timely delivery of high-quality results and developed detailed documentation for integration processes and new product features.

2022 - Present

■ Full Stack Developer

Freelance

Responsible for the design, development, and maintenance of web applications. Continuously enhancing knowledge and gaining hands-on experience as a full-stack developer utilizing the latest technologies and methodologies.

- I have developed numerous front-end and full-stack web applications from the ground up, as well as maintained existing applications utilizing React, TypeScript, and Express.js with Node.js.
- I have acquired experience with Redux, Docker, Microservices, Socket.io, MySQL, Git, and various other technologies.
- I have delivered general back-office management and comprehensive technical support.

2021 - 2023

■ Information Systems Analyst

IDF - Unit 61(Meitav)

Responsible for system analysis, characterization, correct implementation, product testing, and large-scale project management.

- Characterized and tested the implementation of the Socio-Economic Index of Local Authorities by the *Israel Central Bureau of Statistics* into IDF systems. The index is currently utilized by countless military Personnel and systems, impacting the assignment processes for all IDF candidates both prior to and following their enlistment.
- I was one of the select representatives from the unit tasked with evaluating the compatibility of various low-code solutions from reputable companies for potential adaptation by our software development team.

Education

2023 - 2024, Tel Aviv Israel
